

In accordance with Article 4, Paragraph 1 of the Regulation on the Conditions and Procedures for Environmental Impact Assessment, “AES-3C Maritza East 1” Ltd., Galabovo, announces to all interested parties the following investment proposal:

"INSTALLATION FOR ENERGY STORAGE AND ELECTRICITY PRODUCTION THROUGH MOLTEN SALTS."

The goal of the project is to convert one of the power units into a Carnot battery-type energy storage system, which converts electrical energy into heat, stores this thermal energy in molten salt, and then converts it back into electrical energy when needed.

Additional information on the planned changes can be obtained daily until 4 PM by 8th of November 2024 at the administrative building of “AES-3C Maritza East 1” Ltd. in Galabovo. Contact: R. Yanakieva, Environmental Health and Safety Manager, tel. +359 886610130.
